

The New Generation e-Control Aga cooker

Available as 100 Model and 150 Model - {2 -Oven & 4 -Oven}

- An ideal solution if you want a quality built, prestigious Aga that you can 'switch off completely or leave on Eco Mode. Fast heat up times from cold or have the Aga on so its constantly ready to cook and heat your home.
 - Comes with Traditional cast iron ovens.
- E-Control 100 has two ovens, a Roasting oven, and a Simmering oven.
- E-Control 150 has Four ovens, a Roasting oven, simmering oven, baking oven, warming oven and the very handy Hot Cupboard warming plate.
- Both Models have Fast Heat up Times / Top right-hand oven up to roasting temperature in 25 minutes from eco mode and 50 minutes from stone cold to baking temperature.
- Both Models have independently controlled hotplates, the two hotplates are at different heats: the boiling plate being the hottest of the two and the simmering plate being the lower heat. Each plate is individually controlled.
- Hobs up to full temperature from eco mode in 5 minutes, hobs up to cooking temperature in 10-12 minutes from stone cold Hobs up to boiling temperature in 19 minutes.
- Can be ventilated into the room as they are clean burning. The venting on an electric model is purely to allow steam to escape from the ovens. This too allows you greater flexibility when choosing where to position the cooker.
 - E -Control electric Aga cooker is also more controllable, enabling you to regulate your fuel consumption.

Wiring Requirements

E -Control Aga Requires a 32amp power supply, which you will need to organise with your electrician prior to delivery / installation.

We do not sell 3 oven Agas, Aga module/companions or Agas with Aims systems.
